IVDR compliant multicentric clinical performance study

Karolina Kašparová

11 September 2024 | 4 – 5 pm (CEST) | Online Webinar

Join us for an insightful webinar, led by
Karolina Kašparová

Discover the essential role of compliance with the Regulation (EU) 2017/746 on in vitro diagnostic medical devices (IVDR) in enhancing product quality. This webinar will explore how adhering to IVDR ensures the safety and efficacy of technology and drives higher standards in product development and quality control. We will discuss the design of an IVDR-compliant performance study, focusing on how IVDR can benefit startup companies by streamlining processes, reducing risks, and building credibility in the market.

Karolina Kašparová

Karolina has served as a Business Director at Lipidica, a.s. since September 2023, leading the accredited medical lab toward commercializing the new blood test for early pancreatic cancer detection. She has over 20 years of experience in tech transfer and industry positions, including roles at Masaryk University and the University of Pardubice, where she managed TTO.

Online via MS Teams | Please register [here!](#)

Registration for the webinar is required in advance. Please register no later than **(September 10th)**. Please note that you will receive the meeting link and access code the **evening before the lecture** and that access to last minute registrations, cannot be guaranteed.
